

MKU showcases its latest ultra-light weight armour solution for aircrafts

MKU GmbH (formerly AST Security Equipment GmbH, now a wholly owned subsidiary of MKU Pvt Ltd), a leading manufacturer of ballistic protection solutions, exhibited in ILA, Berlin, again this year.

It displayed a range of lightweight ballistic protection systems and unique patented attachment systems for helicopters, including its latest ultra light weight solution which has been developed after extensive R&D efforts and field trials in its lab in Germany.

MKU GmbH is a registered NATO supplier since 1993 as well as an ac-

credited supplier to the Federal Office of Bundeswehr Equipment, Information Technology & In Service Support (BAAINBw). In the last 25 years, MKU GmbH has provided protection solution for more than 200 rotary and fixed wing aircrafts including Mi17, Mi 8, Bell 212 (UH 1D), Super Puma, Sikorsky CH53, Black Hawk. Helicopters armoured by MKU GmbH have seen active service in some of the harshest battlefields of the world like Afghanistan.

MKU GmbH provides end-to-end solutions and complete project management. A System House for design,

development, production, system integration, maintenance and global sale of ballistic protection solutions for land, naval and air platforms, it uses special patented technologies which have been developed over years of R&D effort. MKU GmbH also provides lifecycle support for platform armour.

Ballistic solutions provided by MKU GmbH conform to environmental standards as per MIL 810 G. The facility is EN 9100 certified for development and production of Ballistic Protection systems for aircraft, land vehicles, naval vessels and objects against blast waves, splinters and bullets. ■
